EDUCATION

Information Technology University

Bachelor of Computer Science

Punjab Group of Colleges

Pre-Engineering

Lahore, Punjab

Sept. 2022 – June. 2026

Lahore, Punjab

Oct. 2020 – June. 2022

PROJECTS

Quran Recitation App (Final Year Project) | *Flutter, Whisper API, TensorFlow Lite* Sep 2025 – Present

- Awarded 1st Position in the Computer Science Department at the ITU Sparkup Innovation Summit 2026 for this project.
- Improved recitation error detection by 25% through iterative model fine-tuning on a custom-collected dataset.
- Optimized model inference latency, reducing response time from 10s to 1s via post-training INT8 quantization and local TensorFlow Lite deployment.

Quran Audio Data Collection Platform | *React.js, Node.js, MongoDB* Aug 2025 – Mar 2026

- Built a full-stack platform to crowdsource Quranic recitations for training the FYP's AI model.
- Implemented user authentication and audio upload/validation workflows with MongoDB metadata storage.

Solitaire | *C++, Data Structures & Algorithms* Sep 2023 – Nov 2023

- Built a Solitaire card game with a simple dashboard using Run and Reset controls, backed by stack-based pile management.
- Implemented shuffling, move validation, and win detection using stack and array data structures.

Client-Server Communication System | *C, Operating Systems* Oct 2024 – Dec 2024

- Built a basic client-server communication system in C where the server processes commands sent by the client and returns responses.
- Implemented core OS concepts including sockets/IPC and command parsing to simulate request-response handling.

Chess Game | *C++, Object-Oriented Programming* Feb 2023 – Mar 2023

- Built a console-based two-player chess game implementing full rules (castling, en passant, promotion) using OOP.
- Designed a modular class structure separating board state, piece behavior, and move validation logic.

E-commerce Website | *React.js, Node.js, MongoDB* May 2025 – Present

- Developed a full-stack e-commerce platform with product catalog, cart, authentication, and order management.
- Built RESTful APIs in Node.js/Express with MongoDB for product and user data persistence.

TECHNICAL SKILLS

Languages: C++, HTML/CSS, JavaScript, SQL, python

Frameworks: Linux, GitHub, Reactjs, Nextjs, tailwind css

Developer Tools: Git, Docker, VS Code, Visual Studio

RELEVANT COURSEWORK

- Data Structures
- Algorithms Analysis
- Database Management
- Artificial Intelligence
- Operating Systems
- Compiler Construction
